Rat der Doktorandinnen und Doktoranden der FSU Jena

Together, for our future at the University of Jena!

For the next few years, drastic cuts are planned at the Friedrich Schiller University, which will dramatically affect the conditions and quality of teaching and research:

1. A 6-month hiring freeze for vacancies arising
2. Job cuts of 100 full-time equivalents by 2028, affecting both academic and administrative staff
3. Reduction of the budget for material resources (covering the pay of student employees) by 20%

The planned cuts will not only lead to an increased workload for the remaining employees, but will also affect the quality of teaching and research.

We will not accept this!

We are aware that the University of Jena has a huge budget deficit that is growing from month to month. Solutions are needed, but not at the expense of working conditions and the learning environment!

We call on the university management and the state of Thuringia to find solutions that also ensure good and safe working and teaching conditions at the University of Jena.

We call on all employees and students of the University of Jena to join our "FSU unterfinanziert" (FSU underfunded) alliance.

Let's fight together for good and safe work at the University of Jena!

Let's join forces for a good learning environment!

Come to the meetings and actions we're planning and bring your colleagues, fellow students and friends!
